

Automated Rollout

5/6/2025

Agenda

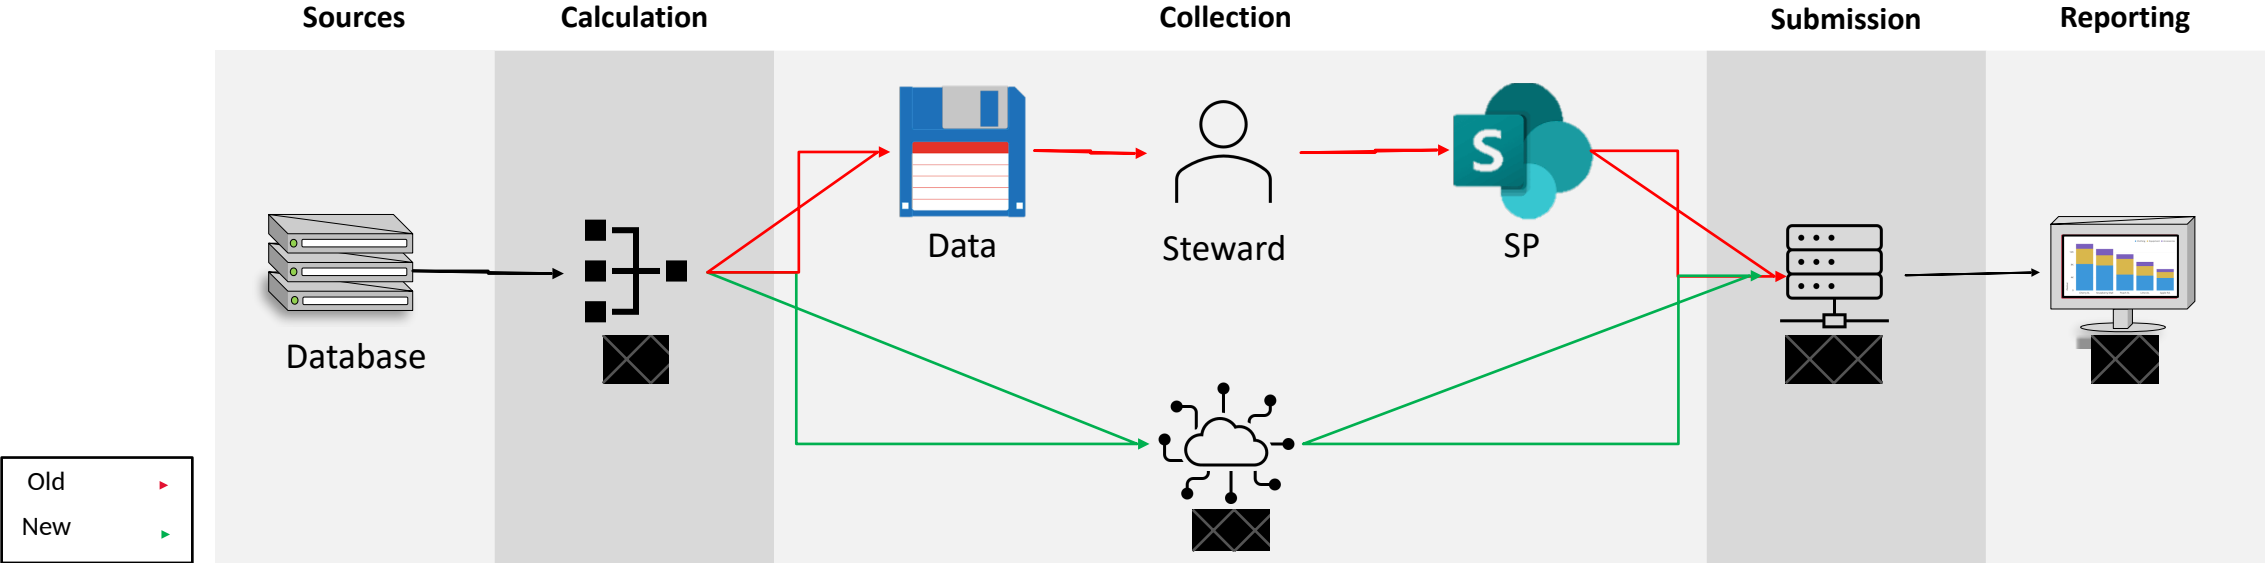

- What is the Current Problem?
- Cover Initial Solution Features
- Update on Development Timeline
- Next Steps
- Future Development Plans

Metrics Automation Initiative

The Challenge

The existing process is unnecessarily manual and requires consistent user input which is inefficient, creates a key man risk, and introduces opportunity for input error.

Solution
An application dedicated to collecting metrics:
• One-time configuration • API to collect metric submission • Breach workflow and notification

Benefits
1. Automated collection, transfer, and reporting 2. Guarantee of on time submission 3. Embedded controls 4. Teams focus on higher-value activities 5. Eliminate key man risk

How
Transition from manual submissions to schedule driven automation via API
Total Implementation Effort:
2-10 Hours

Initial Features

Metric Collection

Configure and submit metric values

Delivery via API

Send metric values automatically to a dedicated endpoint

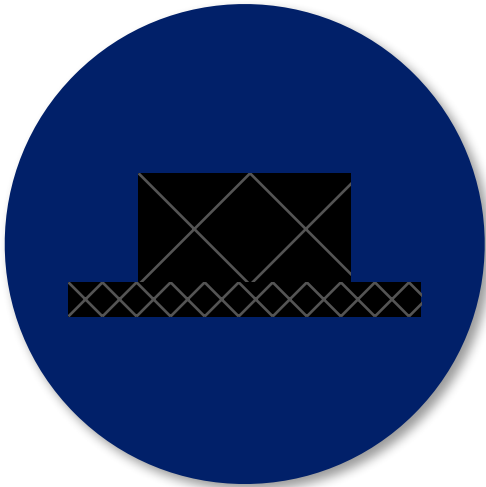

Automated Reporting

On-demand live view into configured metrics

Breaches

Manage breaches and their associated action plans

Metrics Development Timeline

Next Steps

Initial Connection

- Identify lead point of contact
- Establish working group cadence

Technical Understanding

- Understand current state of client metric generation
- Identify potential issues and risks
- Create detailed timeline

API Details

- Deliver API details from tech team
- Establish connection between systems

Implementation and UAT

- Develop API call from client to 
- Schedule delivery job on a defined cadence
- Test for proper data transfer and functionality

Metric Supporting Evidence

Ability for users to attach evidence to each metric upload to justify metric value.

Additional Metrics

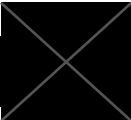

Allow users to collect, submit, and report on any metric currently associated with a process.

Pending Metrics

Provide the opportunity for users to verify metric submissions before confirmation.

Upload Validation

Notifications delivered to key parties of a metrics delivery to ORCIT.

Appendix

API Guidelines

POST: /metrics/{metric_instance}

Body: {
 date: Date,
 value: Float
}

Example Request: /metrics/55832

Body: {
 date: 2/15/2025,
 value: .9865
}
