

ERFT DQCE Transformation

Automated PRC Rollout

5/6/2025

Agenda

- What is the Current Problem?
- Cover Initial Solution Features
- Update on Development Timeline
- Next Steps
- Future Development Plans

PRC Metrics Automation Initiative

The Challenge

The existing PRC Metrics process is unnecessarily manual and requires consistent user input which is inefficient, creates a key man risk, and introduces opportunity for input error.

Solution

An application dedicated to collecting PRC metrics:

- One-time configuration
- API to collect metric submission
- Breach workflow and notification

Benefits

1. Automated collection, transfer, and reporting
2. Guarantee of on time submission
3. Embedded controls
4. Teams focus on higher-value activities
5. Eliminate key man risk

How

Transition from manual submissions to schedule driven automation via API

Total Implementation Effort:

2-10 Hours

Initial Features

Metric Collection

Configure and submit metric values

Delivery via API

Send metric values automatically to a dedicated endpoint

AMP

Automated Metric Processing

Automated Reporting

On-demand live view into configured metrics

Breaches

Manage breaches and their associated action plans

PRC Metrics Development Timeline

Next Steps

Initial Connection

- Identify lead point of contact
- Establish working group cadence

Technical Understanding

- Understand current state of client metric generation
- Identify potential issues and risks
- Create detailed timeline

API Details

- Deliver API details from tech team
- Establish connection between systems

Implementation and UAT

- Develop API call from client to AMP
- Schedule delivery job on a defined cadence
- Test for proper data transfer and functionality

Future Development Plans

Metric Supporting Evidence

Ability for users to attach evidence to each metric upload to justify metric value.

Additional Metrics

Allow users to collect, submit, and report on any metric currently associated with a process.

Pending Metrics

Provide the opportunity for users to verify metric submissions before confirmation.

Upload Validation

Notifications delivered to key parties of a metrics delivery to ORCIT.

Appendix

API Guidelines

Metric History

Metric - 123456

Metric Over Time

The chart displays a blue line representing the metric value over time. The Y-axis is labeled 'Y-Axis' and the X-axis is labeled 'X-Axis'. Two horizontal threshold lines are shown: a yellow line and a red line. The area under the line is shaded blue. The line starts high, dips below the red threshold, then rises above the yellow threshold, and finally dips again.

#	Date	Value	Breach ID	Red Threshold	Yellow Threshold		
75	12/5/2024	99.99	NA	94.99	97.99	✕	✕
74	12/4/2024	93.65	3	94.99	97.99	✕	✕
73	12/3/2024	91.23	3	94.99	97.99	✕	✕
72	12/2/2024	90.13	3	94.99	97.99	✕	✕
