

DARIL Testing Plan

Created by Daugherty, Austin on Feb 05, 2024

Revision History		
Name	Date	Changes Made
Austin Daugherty	11/13/2023	Initial Document

Black Box Tests

Test	Input	Expected	Actual
Navigate to Product	1. The user navigates to the production version of DARIL	- There is no authentication required. - The session is reset from any previous or other user's session	- There is no authentication required. - The session is reset from any previous or other user's session
Load An ADS Network	1. The user navigates to DARIL 2. The user selects from the source dropdown: "Credit Risk Platform – 60425"	- The network for CRP is shown. - A maximum of one AIT out from the source ADS is shown. - PDEs are shown as yellow circles. - Reports with Data are shown as green stars. - Reports without Data are shown as Black stars. - AITs are shown as dark blue squares. - ADSs are shown as dark blue database icons. - Reports and AITs with DART data are red - No "Other" nodes are shown.	- The network for CRP is shown. - A maximum of one AIT out from the source ADS is shown. - PDEs are shown as yellow circles. - Reports with Data are shown as green stars. - Reports without Data are shown as Black stars. - AITs are shown as dark blue squares. - ADSs are shown as dark blue database icons. - Reports and AITs with DART data are red - No "Other" nodes are shown.
Hover Report	1. The user navigates to DARIL 2. The user selects from the source dropdown: "Credit Risk Platform – 60425" 3. The user hovers over the Report Node: "Outstanding Consolidated Claims on Mexico"	A tooltip is displayed saying: ERR ID - 3323 Report - Outstanding Consolidated Claims on Mexico. Type - NFRR 100.00% of PDEs Found in Source ADS	A tooltip is displayed saying: ERR ID - 3323 Report - Outstanding Consolidated Claims on Mexico. Type - NFRR 100.00% of PDEs Found in Source ADS

Hover PDE	1. The user navigates to DARIL 2. The user selects from the source dropdown: "Credit Risk Platform – 60425" 3. The user hovers over the PDE Node: "PRODUCT_TYPE"	• A tooltip is displayed saying: Physical PDE ID - 19112 PDE Name - PRODUCT_TYPE	• A tooltip is displayed saying: Physical PDE ID - 19112 PDE Name - PRODUCT_TYPE
Hover AIT	1. The user navigates to DARIL 2. The user selects from the source dropdown: "Credit Risk Platform – 60425" 3. The user hovers over the AIT Node: "CREDIT RISK PLATFORM"	• A tooltip is displayed saying: AIT Number - 60425 Name - Credit Risk Platform DART Incidents - 18710, 18710, 18691, 18697, 862	• A tooltip is displayed saying: AIT Number - 60425 Name - Credit Risk Platform DART Incidents - 18710, 18710, 18691, 18697, 862
Hover Dud	1. The user navigates to DARIL 2. The user selects from the source dropdown: "Credit Risk Platform – 60425" 3. The user hovers over the Dud Node: "Industry Limit and Usage Report"	• A tooltip is displayed saying: ERR ID - 25 Report - Industry Limit and Usage Report Type - N/A 0.00% of PDEs Found in Source ADS	• A tooltip is displayed saying: ERR ID - 25 Report - Industry Limit and Usage Report Type - N/A 0.00% of PDEs Found in Source ADS
Filter Report	1. The user navigates to DARIL 2. The user selects from the source dropdown: "Credit Risk Platform – 60425" 3. The user clicks the Report node: "FR Y-14Q Sch A.7_LED-005953_FRB" 4. The user clicks the "Reset Filters" button	• The following nodes are highlighted: - o FR Y-14Q Sch A.7_LED-005953_FRB - o PRODUCT_TYPE (x2) - o ORIG_LTV - o CREDIT RISK PLAFORM - o Global Risk Analytics – Risk Analytics Platform - o Treasury ADS Global - o Global Markets Provisioning Point (GMPP / Zinc) - o Wholesale Credit ADS	• The following nodes are highlighted: - o FR Y-14Q Sch A.7_LED-005953_FRB - o PRODUCT_TYPE (x2) - o ORIG_LTV - o CREDIT RISK PLAFORM - o Global Risk Analytics – Risk Analytics Platform - o Treasury ADS Global - o Global Markets Provisioning Point (GMPP / Zinc) - o Wholesale Credit ADS

		- o CREDIT STUDIO • Any edge between any of two nodes highlighted are also highlighted • The Report filter is set to FR Y-14Q Sch A.7_LED-005953_FRB • The view is returned to normal and the filters are all reset to display the value: "All"	- o CREDIT STUDIO • Any edge between any of two nodes highlighted are also highlighted • The Report filter is set to FR Y-14Q Sch A.7_LED-005953_FRB • The view is returned to normal and the filters are all reset to display the value: "All"
Filter PDE	1. The user navigates to DARIL 2. The user selects from the source dropdown: "Credit Risk Platform – 60425" 3. The user clicks the PDE node: "OBLIGORNAME" 4. The user clicks the "Reset Filters" button	• The following nodes are highlighted: - o OBLIGORNAME - o Product Classification Code Generator - o Credit Risk Platform - o FR Y-14Q Sch H.1_LED-005953_FRB - o FR Y-14Q Sch H.2_LED-005953_FRB • Any edge between any of two nodes highlighted are also highlighted • The PDE filter is set to OBLIGORNAME • The view is returned to normal and the filters are all reset to display the value: "All"	• The following nodes are highlighted: - o OBLIGORNAME - o Product Classification Code Generator - o Credit Risk Platform - o FR Y-14Q Sch H.1_LED-005953_FRB - o FR Y-14Q Sch H.2_LED-005953_FRB • Any edge between any of two nodes highlighted are also highlighted • The PDE filter is set to OBLIGORNAME • The view is returned to normal and the filters are all reset to display the value: "All"
Filter AIT	1. The user navigates to DARIL 2. The user selects from the source dropdown: "Credit Risk Platform – 60425" 3. The user clicks the AIT: "Product Classification Code Generator" 4. The user clicks the "Reset Filters" button	• The following nodes are highlighted: - o Product Classification Code Generator - o OBLIGORNAME - o INTERNALOBLIGORID - o COMMITTEDEXPOSURE - o UTILIZEDEXPOSURE - o N/A - o LINEREPORTEDONFRY9C - o COLLATERALMARKETVALUE - o FACILITYTYPE - o LIENPOSITION - o SECURITYTYPE - o PME REFERENCE DATA MART (RDP) - o Enterprise Referential Data Repository - o Global Risk Analytics – Risk Analytics Platform - o ARTIC – Architecture for Reg, Credit & Treasury - o Credit Risk Platform - o FR Y-14Q Sch H.1_LED-005953_FRB - o FR Y-14Q Sch H.2_LED-005953_FRB - o Affirmative Statement of Transactional Amounts Electronic Registry	• The following nodes are highlighted: - o Product Classification Code Generator - o OBLIGORNAME - o INTERNALOBLIGORID - o COMMITTEDEXPOSURE - o UTILIZEDEXPOSURE - o N/A - o LINEREPORTEDONFRY9C - o COLLATERALMARKETVALUE - o FACILITYTYPE - o LIENPOSITION - o SECURITYTYPE - o PME REFERENCE DATA MART (RDP) - o Enterprise Referential Data Repository - o Global Risk Analytics – Risk Analytics Platform - o ARTIC – Architecture for Reg, Credit & Treasury - o Credit Risk Platform - o FR Y-14Q Sch H.1_LED-005953_FRB - o FR Y-14Q Sch H.2_LED-005953_FRB - o Affirmative Statement of Transactional Amounts Electronic Registry

		- Any edge between any of two nodes highlighted are also highlighted - The AIT/ADS filter is set to Product Classification Code Generator - The view is returned to normal and the filters are all reset to display the value: "All"	- Any edge between any of two nodes highlighted are also highlighted - The AIT/ADS filter is set to Product Classification Code Generator - The view is returned to normal and the filters are all reset to display the value: "All"
Filter Regulator	- The user navigates to DARIL - The user selects from the source dropdown: "Credit Risk Platform – 60425" - The user selects the Regulator from the Regulator dropdown: "Bank of Mexico" - The user clicks the "Reset Filters" button	- The following nodes are highlighted: - Outstanding Consolidated Claims on Mexico - NULL - LEGALLY_BIND_USD_AMT - Credit Risk Platform (CRP) - Any edge between any of two nodes highlighted are also highlighted - The view is returned to normal and the filters are all reset to display the value: "All"	- The following nodes are highlighted: - Outstanding Consolidated Claims on Mexico - NULL - LEGALLY_BIND_USD_AMT - Credit Risk Platform (CRP) - Any edge between any of two nodes highlighted are also highlighted - The view is returned to normal and the filters are all reset to display the value: "All"
Filter Multiple 1	- The user navigates to DARIL - The user selects from the source dropdown: "Credit Risk Platform – 60425" - The user selects the Regulator from the Regulator dropdown: "Federal Reserve Bank" - The user selects the Report from the Report dropdown: "FR Y-14Q Sch A.7_LED-005953_FRB" - The user selects the AIT from the AIT/ADS dropdown: "Credit Risk Platform" - The user selects the PDE from the PDE	- The following nodes are highlighted: - ORIG_LTV - Credit Risk Platform (CRP) - FR Y-14Q Sch A.7_LED-005953_FRB - Any edge between any of two nodes highlighted are also highlighted. - The view is returned to normal, and the filters are all reset to display the value: "All"	- The following nodes are highlighted: - ORIG_LTV - Credit Risk Platform (CRP) - FR Y-14Q Sch A.7_LED-005953_FRB - Any edge between any of two nodes highlighted are also highlighted. - The view is returned to normal, and the filters are all reset to display the value: "All"

	dropdown: "ORIG_LTV" 7. The user clicks anywhere in the visualization that is white space		
Filter Multiple 2	1. The user navigates to DARIL 2. The user selects from the source dropdown: "Credit Risk Platform – 60425" 3. The user selects the Report from the Report dropdown: "Outstanding Consolidated Claims on Mexico" 4. The user selects the PDE from the PDE dropdown: "ORIG_LTV" 5. The user clicks anywhere in the visualization that is white space	• All nodes and edges are highlighted. • The view is returned to normal, and the filters are all reset to display the value: "All"	• All nodes and edges are highlighted. • The view is returned to normal, and the filters are all reset to display the value: "All"
System View	1. The user navigates to DARIL 2. The user selects from the source dropdown: "Credit Risk Platform – 60425" 3. The user switches the view to system mode. 4. The user selects from the source dropdown: "Credit Studio – 26706"	• All nodes and edges are shown except PDE nodes and edges attached to them. • The Credit Studio visualization is shown in the system view.	• All nodes and edges are shown except PDE nodes and edges attached to them. • The Credit Studio visualization is shown in the system view.
System View 2	1. The user navigates to DARIL 2. The user selects from the source dropdown: "Credit Risk Platform – 60425"	• All nodes and edges are shown except PDE nodes and edges attached to them. • All nodes are highlighted	• All nodes and edges are shown except PDE nodes and edges attached to them. • All nodes are highlighted

	3. The user switches the view to system mode. 4. The user clicks Report node: “261 JCIC Monthly derivative facilities and utilization for counterparties”		
Report Centric	1. The user navigates to DARIL 2. The user switches the view to system mode. 3. The user selects from the source dropdown: “FR Y-14Q Sch A.7_LED-005953_FRB”	• The source dropdown is populated with Reports available to select. • The following nodes are shown: ◦ FR Y-14Q Sch A.7_LED-005953_FRB ◦ Credit Risk Platform ◦ Wholesale Credit ADS ◦ Global Risk Analytics – Risk Analytics Platform ◦ CREDIT STUDIO ◦ Global Markets Provisioning Point (GMPP / Zinc) ◦ Treasury ADS Global ◦ PRODUCT_TYPE ◦ ORIG_LTV ◦ PRODUCT_TYPE	• The source dropdown is populated with Reports available to select. • The following nodes are shown: ◦ FR Y-14Q Sch A.7_LED-005953_FRB ◦ Credit Risk Platform ◦ Wholesale Credit ADS ◦ Global Risk Analytics – Risk Analytics Platform ◦ CREDIT STUDIO ◦ Global Markets Provisioning Point (GMPP / Zinc) ◦ Treasury ADS Global ◦ PRODUCT_TYPE ◦ ORIG_LTV ◦ PRODUCT_TYPE
Report Centric Interaction	1. The user navigates to DARIL 2. The user switches the Centricity to Report mode. 3. The user selects from the source dropdown: “FR Y-14Q Sch A.7_LED-005953_FRB” 4. The user selects the Regulator from the Regulator dropdown: “Bank of Mexico” 5. The user selects the Report from the Report dropdown: “FR Y-14Q Sch A.7_LED-005953_FRB” 6. The user selects the AIT from the AIT/ADS dropdown:	• The source dropdown is populated with Reports available to select. • The following nodes are shown: ◦ FR Y-14Q Sch A.7_LED-005953_FRB ◦ Credit Risk Platform ◦ ORIG_LTV • All nodes are highlighted	• The source dropdown is populated with Reports available to select. • The following nodes are shown: ◦ FR Y-14Q Sch A.7_LED-005953_FRB ◦ Credit Risk Platform ◦ ORIG_LTV • All nodes are highlighted

	“Credit Risk Platform” 7. The user selects the PDE from the PDE dropdown: “ORIG_LTV” 8. The user clicks anywhere in the visualization that is white space		
Report Centric System View	1. The user navigates to DARIL 2. The user switches the Centricity to Report mode. 3. The user switches the view to system mode. 4. The user selects from the source dropdown: “FR Y-14Q Sch A.7_LED-005953_FRB”	- The following nodes are shown: - FR Y-14Q Sch A.7_LED-005953_FRB - Credit Risk Platform - Wholesale Credit ADS - Global Risk Analytics – Risk Analytics Platform - CREDIT STUDIO - Global Markets Provisioning Point (GMPP / Zinc) - Treasury ADS Global - All nodes are highlighted	- The following nodes are shown: - FR Y-14Q Sch A.7_LED-005953_FRB - Credit Risk Platform - Wholesale Credit ADS - Global Risk Analytics – Risk Analytics Platform - CREDIT STUDIO - Global Markets Provisioning Point (GMPP / Zinc) - Treasury ADS Global - All nodes are highlighted
Export	1. The user navigates to DARIL 2. The user selects from the source dropdown: “Credit Risk Platform – 60425”	1 Sheet is included to display the ERR ID, Report Name, and Report Regulator related to Reports shown in the view. *See reference table 1 1 sheet is included to display the mapping of Report to its associated PDEs and to their associated AITs. *See reference table 2	1 Sheet is included to display the ERR ID, Report Name, and Report Regulator related to Reports shown in the view. *See reference table 1 1 sheet is included to display the mapping of Report to its associated PDEs and to their associated AITs. *See reference table 2
